

Achieve a stronger return on your Sologic[®] training investment by building a sustainable RCA program with a clear roadmap for success.

After years of working with organizations across a wide range of industries, we observe that clients consistently attain better results when they align and integrate their root cause analysis program with their existing work processes and systems. This not only supports their unique business goals – it anticipates and eliminates roadblocks that could impede RCA success. The Sologic Turnkey Workshop gathers stakeholders, managers, leaders and key team members to create and unite around a strategic, specific RCA plan.

Choose the 1.5-day Turnkey or four-hour Turnkey Light workshop and prepare your organization to realize greater results from your analyses and investigations. Our experienced workshop facilitator will work with your team to create and implement a complete change management plan to support your RCA goals. You'll finish the workshop with a detailed checklist that clearly outlines action items, roles and responsibilities, KPIs, and corrective action tracking systems.

By investing less than two days in upfront planning, you'll realize substantially larger benefits from your root cause analysis efforts and ensure the sustainability of your program – even if an important employee leaves the team. It's an affordable and cost-effective way to define your RCA goals, minimize pain points, and increase your return on investment (ROI). You will finish the workshop with a complete program roadmap and work process.

Your Turnkey Roadmap

- Detailed plans outlining employee professional development objectives and training plans
- Fully-defined team responsibilities with individually-assigned roles
- Specific KPIs, program impact goals, RCA threshold triggers and success metrics
- Plans for integrating solutions with corrective action tracking systems
- Change management plans to minimize both human and systematic disruptions, road blocks and organizational issues

Empower Yourself

- Align Sologic RCA with business goals and objectives
- Develop specific investigation criteria and KPIs to track program success
- Determine the right people to benefit from Sologic training
- Map out a tailored RCA implementation and change management plan
- Ensure immediate and long-term program success and sustainability
- Maximize ROI and realize greater benefits from performing RCAs
- Clarify goals, address concerns, unify the team, and ensure stakeholder buy-in

Why Sologic RCA?

- Draws on the most advanced cause-and-effect methods and best practices; simultaneously simple - focused on steps that deliver value and save time
- Universal, scalable, practical and intuitive for RCA novices and experts alike
- Logical, complete and accurate process and terminology that's aligned with how the world actually works
- Takes the focus away from non-specific causes, opinion, blame and punishment; shifts the focus to systemic causes, objectivity, collaboration and data
- Client feedback and field investigation experience consistently feeds continuous improvement of the method and training

Program Details

- Choose from Sologic Turnkey (1.5 days on-site) or Turnkey Light (half-day on-site)
- Workshop is customized and modular, based on pre-session phone interviews
