

Join thousands of students who've benefited from Sologic RCA training, saving their organizations time and money by solving tough problems.

Sologic's[®] Blended Facilitator training offers exceptional flexibility and reduces costs by 60 percent, compared to a traditional two-day course. Blended Facilitator students complete the Sologic eRCA - Participant Fundamentals e-learning module on their own time, before spending one fast-paced, highly interactive day in the classroom. The eRCA - Participant Fundamentals course applies the latest multi-media design and instruction techniques to accommodate varied learning styles. It's also SCORM- and AICC-compliant with learning management systems.

In a full day of classroom training, students will learn current and proven best practices in cause-and effect analysis from Sologic instructors. Our team has extensive experience applying the Sologic method to recurring and systemic problems, incidents such as catastrophic events, and positive and proactive analyses. By applying Sologic's RCA method to real-world problems and incidents, you'll gain the knowledge, tools and confidence you need to lead successful root cause analyses.

Empower RCA Teams

- Unify around a common methodology, language and terminology
- Perform and facilitate an RCA
- Gather evidence, interview stakeholders and lead an investigation team
- Identify, understand and correct systemic causes
- Pinpoint effective solutions to problems of any magnitude
- Minimize the impact of human behavior and errors
- Utilize Sologic Causelink[®] software to visually depict cause and effect relationships, prepare a final RCA report, and analyze and share data
- Effectively communicate RCA findings, solutions and trends

The Sologic RCA Method

- Universal, scalable, practical and intuitive for RCA novices and experts alike
- Logical, complete and accurate process and terminology that's aligned with how the world actually works
- Takes the focus away from non-specific causes, opinion, blame and punishment; shifts the focus to systemic causes, objectivity, collaboration and data
- Enables RCA facilitators and teams to more effectively and efficiently identify true causes and effective solutions
- Informs business decisions and supports achievement of business goals
- Based on extensive feedback from our clients as we work with them to build RCA programs that effectively solve and prevent real-world problems
- Client feedback loop consistently feeds continuous improvement of method and training
