

Causelink Enterprise makes RCA program deployment easier and more impactful.

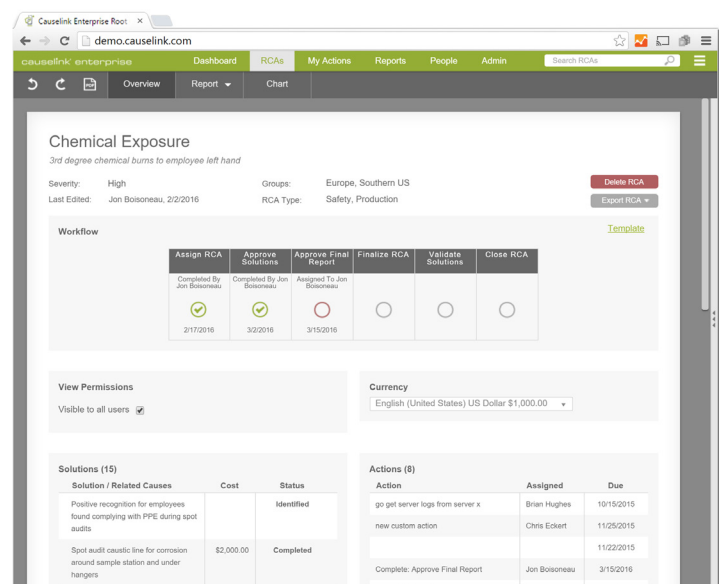

- Is it a challenge to obtain the status of your RCAs status?
- Have you rolled out RCA in the past, only to watch the program fade away?
- Do you want to install an RCA program, but can't find the time?

If these questions sound familiar, Causelink Enterprise can help. Causelink Enterprise software stores all RCAs in one system, enabling you to make use of the data you already have and increase team collaboration.

- Monitor RCA status, action items, and progress
- Run reports on RCA status, locations, cost, severity, and more
- Manage the RCA workflow
- Obtain metrics on "time to complete" for the different stages of the RCA
- Identify common and systemic causes that create many of your problems
- Define, roles, responsibilities, and permissions
- Preserve problem knowledge despite employee turnover
- Track actions across your organization

The dashboard provides a comprehensive overview of RCA activities. It includes sections for 'Recent RCAs' with a list of incidents and their statuses, 'My Open Action Items' with a table of tasks and due dates, a 'Workflow' bar chart, and 'Common Causes' represented by a bubble chart. A world map shows the geographic distribution of 'Open RCAs'.

This view details a specific RCA for 'Chemical Exposure'. It shows the severity (High), last edited date, and RCA type (Safety, Production). A workflow table tracks the progress through stages: Assign RCA, Approve Solutions, Approve Final Report, Finalize RCA, Validate Solutions, and Close RCA. Below, there are sections for 'View Permissions', 'Currency', 'Solutions (15)', and 'Actions (8)' with associated tables.

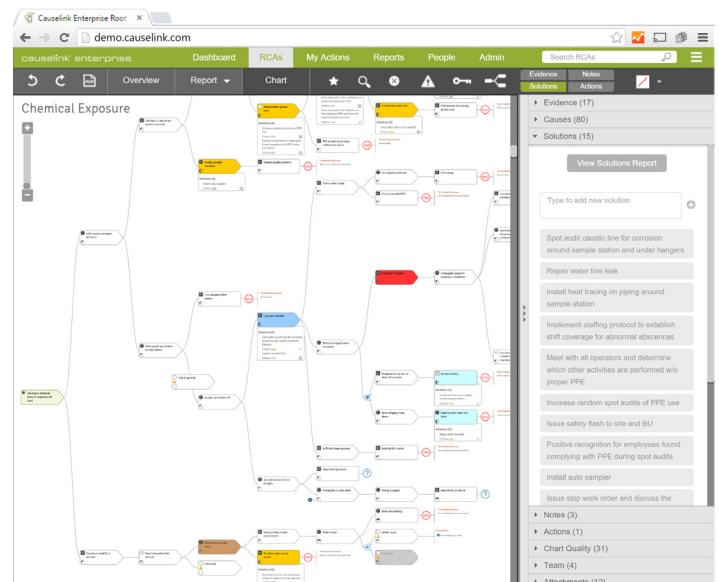

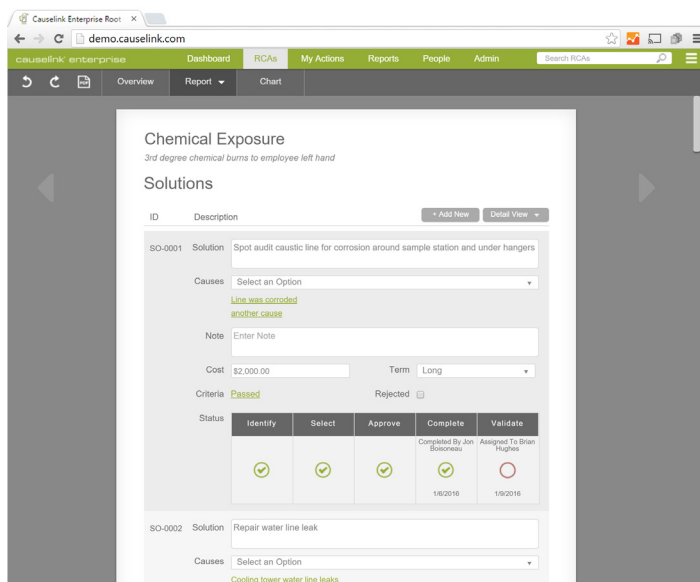

Assign RCA	Approve Solutions	Approve Final Report	Finalize RCA	Validate Solutions	Close RCA
Completed By Jon Boisneau 2/17/2016	Completed By Jon Boisneau 3/2/2016	Assigned To Jon Boisneau 3/15/2016			

Solution / Related Causes	Cost	Status
Positive recognition for employees found complying with PPE during spot audits		Identified
Spot audit caustic line for corrosion around sample station and under hangers	\$2,000.00	Completed

Action	Assigned	Due
go get server logs from server x	Brian Hughes	10/15/2015
new custom action	Chris Eckert	11/25/2015
Complete: Approve Final Report	Jon Boisneau	3/15/2016

In addition to these benefits, Causelink Enterprise deploys the “keys to success” for durable, effective RCA programs by establishing:

- Roles and responsibilities within the RCA program
- Consistent and streamlined reporting and information storage
- Action tracking and notification
- Lessons learned sharing
- Workflow management

Causelink Enterprise is a .NET application deployed within your network or hosted by Sologic. Concurrent licenses range from a 5-seat license up to unlimited use.

To place an order or schedule an online demonstration of Causelink Enterprise, please contact Sologic at www.sologic.com, info@sologic.com, or 800-375-0414.
