

Root cause analysis tools, training,
software & investigations

Dear Cory,

This month, our example problem explores the public health problem of **opioid addiction**. This alarming report examines multiple perspectives, including public policy, the pharmaceutical industry, and addicts themselves. You'll also find information about our new example problem search feature, opportunities to get involved with software focus groups, and our webinar and training schedule.

RCA Example: Impact of Opioid Addiction

Learn about the causes and negative impacts of opioid addiction and see how solutions can act on causes to improve the problem and prevent it from getting worse.
