

Root cause analysis tools, training,
software & investigations

Dear Cory,

We hope your improvement goals for 2017 are off to a great start. If you haven't already, [contact us](#) to get your RCA training scheduled for Q1/Q2.

Our example this month involves the recent **Ghost Ship Warehouse Fire** in Oakland, CA, which resulted in the deaths of 36 people. Review the causes of this horrific event and see how it could have been prevented. In addition, see news about Causelink software plans for 2017, our latest blog post, and updates to Sologic's webinar and training schedule.

RCA Example: Ghost Ship Warehouse Fire

36 people were killed and 102 were at risk of death or serious injury when the Ghost Ship Warehouse caught fire in Oakland on December 2nd, 2016. We examine the presently-known causes, and expose the areas where more information is still needed.

Blog: The Impacts of A.I. on RCA?

Through ongoing development of artificial intelligence(AI)/cognitive computing, the answers to complex problems are becoming more

available (and getting more accurate). The underlying challenge is in collecting the data needed by AI algorithms to draw conclusions. [Read the blog](#) to learn how RCA software is beginning to incorporate this technology and how it may affect your organization.

Plans for Causelink RCA Software in 2017

We have finalized our Causelink Enterprise development schedule for the first half of 2017. Major initiatives include Incident Timeline, new reports, data visualization, and a big improvement to dashboards and the user interface. As with past updates, these changes were suggested by

customers from a wide range of industries and disciplines.

We are also making many of these same improvements in **Causelink Individual**. This new product offers many of the benefits of Causelink Enterprise, while catering to Individual users. Sign up for the **14-day free trial** to learn more about this exciting product.
